

## Activities Week DVD

You have been asked to create a cover for a School produced DVD on one of the various Activities weeks.

Your first task is to create a collage of images in Photoshop. You can find images to help you in various subfolders from Resources > Subjects > InfoTech > ActivityWeek. The images should be a combination of rectangular, elliptical and irregular cuts. The size of the Dvd cover fits within a Landscape A4 sheet as shown below.

Your second task is to place the image into either illustrator or InDesign to add text labels. This should include the trip location, year and the activities shown (ie High Ropes). You should also add the school logo and name. You should not use more than 3 fonts or 3 colours for the writing. The Dvd is for this years forthcoming trip.

The third task is to create a flash animation based on these images to be used on the DVD and for advertising the trip on a website.
