

## Year 9 ICT Extended Exam Revision Project

The actual practical examination in ICT will last for 60 minutes. You will be expected to use the following programs (Software): Dreamweaver, Flash (+possibly Soundbooth), Photoshop (or Fireworks), Illustrator, Word and Internet Explorer.

You will be asked to create a website of approximately 4 pages in length. Marks will be awarded for clear evidence that you have successfully attempted to use the various skills. These skills will be listed on the exam paper. It is your responsibility to save your work frequently. You are advised to save the work every 5 minutes. This exercise develops these skills in more depth and is hence in excess of 4 pages...

The information used to produce the webpages, both the text and the images can be found from various locations on the school network or Internet. For the exam most text file work should be copied rather than retyped, you may do this with this project too. You are advised to create the work in the order given, Homepage (index.html) first:

|   |   |     |
|---|---|-----|
| Create and Save a new webpage into a newly created folder | Dreamweaver – Create new webpage then Save. Create a new folder by using this icon  prior to saving. Rename it from New Folder!  | 5%  |
| Add / Modify a Table to control the layout                | Within Dreamweaver use the Insert >Table feature. To change, block the cells and use Modify > Table > features Split Cell, Insert / Delete Row.   | 10% |
| Change the Page Title                                     |    | 5%  |
| Colour the cells and their borders or removed them.       | Select the cells and use the toolbox at the bottom of the screen Bg & Brdr    | 5%  |
| Insert / Edit an Image                                    | Dreamweaver – Insert > Image. Photoshop / Fireworks to edit (+Rollover feature). Irregular cuts and Image Effects   | 20% |
| Insert a Hyperlink  | Type the text of the Hyperlink in, then block it. Now use the toolbox at the bottom of the screen to set the link to the appropriate file. You cannot create a hyperlink unless the other page is already saved!  | 5%  |
| Insert a Spry   | Dreamweaver – Insert > Spry > Spry Menu Bar > Horizontal  | 5%  |
| Insert Text from a file                                   | Open the text file, probably into Notepad. Copy the text and then paste onto the webpage within Dreamweaver.  | 10% |
| Create a Flash Animation                                  | Load Flash. Copy & load a flash file (.fla) for modifying or Create from new. Set the size of the stage first by changing the setting at the bottom of the screen. Remember to “Group” every object on each layer and that you can only move objects on different layers. To add exist images to Flash use the “File > Import to Stage” method. The Timeline.... Insert Keyframe to the end frame first, then move back one frame and Create a Motion Tween. Without moving frames insert another keyframe. Sometimes the object may resizes itself and you will need to resize it manually! Add additional keyframes at key movement points. You can move or rotate / resize the object only on any of the keyframes set. Transform / Transition. Add an edited sound! | 20% |
| Export your Flash Animation in a Form                     | To be able to include your flash animation in your website – you must use File > Export > Flash Movie. This will save it as a “.swf” that Dreamweaver can then add. In Dreamweaver use Insert > Media > Flash.  | 5%  |
| Create a “linked” PDF file                                | Using Word / Illustrator create a PDF file that is then linked to your website.   | 10% |

***If all else fails... Save any work, close the program and try again!***

# BASH WEBSITE

## DESIGN

- Two Animated Logos
  - 1) B+NES

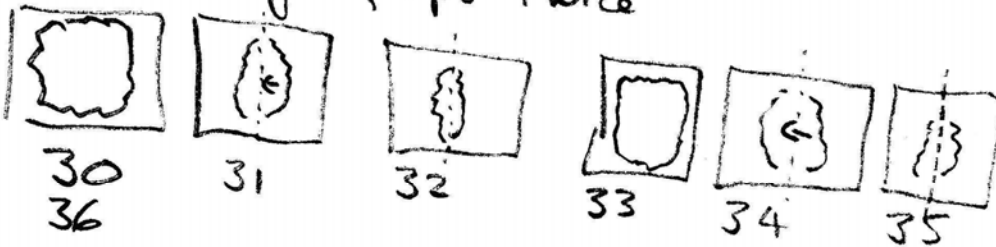

Normal B+NES Logo

For 6 seconds every minute the green + blue Triangles "Spin" in a Anti-clockwise Direction  
 PLUS - B+NES text changes colour: FIRST LETTER OF EACH word for 1 second in sequence.

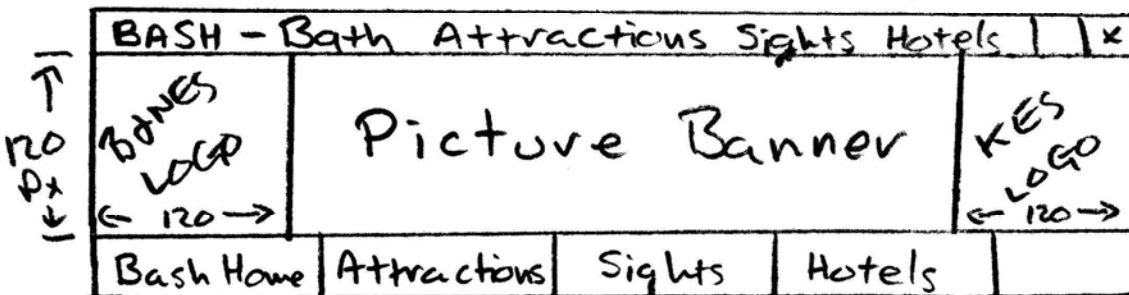

- 2) KES LOGO

One Minute Animation from 30 to the 36<sup>th</sup> Second Logo flips twice

- Top of Every Webpage

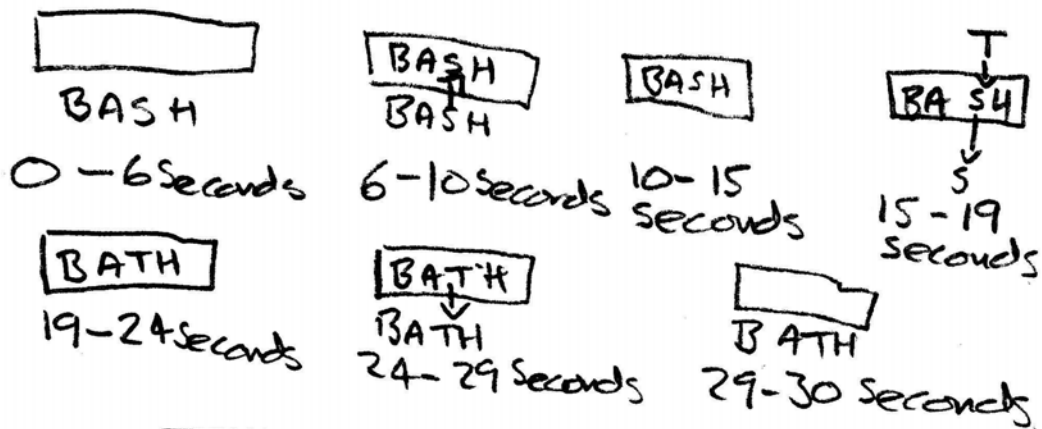

↖ 4 Sprys with pull down lists ↗

- Picture Banner (640 x 120)
    - Five or Six Images of Bath
    - Each on screen for 5/6 seconds
    - One Second fade in/out of each image
    - Total Duration 30 seconds
- Plus (on top of images)

BASH

White inside → (pointing to the 'B')

↑ 1pt black line (pointing to the top of the 'B')
